

Objectives of the Summer School

The shortage of resources and global warming are big challenges on global and local level. Sustainable solid waste and waste water management play an important role in resource efficiency and to substitute fossil fuels by closing the loop of materials and water systems and by energy recovery of organic residues. Sustainability also means to reduce pollutants in waste and waste water (e.g. anthropogenic trace compounds).

How will we meet the challenge? Technical, social and also economical aspects have to be addressed. We want to develop sustainable systems in solid waste and water management in lectures, workshops with projects and excursions, working together in interdisciplinary groups.

Indo-German Centre for Sustainability (IGCS)

The IGCS is a joint German and Indian centre developing fundamental and applied interdisciplinary research, teaching and training, and dissemination of information in the area of sustainable development.

IGCS is coordinated by RWTH Aachen and funded by the German Academic Exchange Service (DAAD) in the program "A New Passage to India".

Contact

For all matters concerning visa and funding please contact
portius@igcs-chennai.org.

For all course related matters please enquire
by e-mail to eugenia.steinbach@uni-stuttgart.de.

Organizers

IGCS Centre Coordinators

Prof. Dr. Sudhir Chella Rajan,
IGCS Centre Coordinator,
Department of Humanities and Social Sciences,
IIT Madras

Prof. Dr. Rafiq Azzam,
Head of Department of Engineering Geology and
Hydrogeology, RWTH Aachen University

IGCS Area Coordinators

Prof. Dr. Martin Kranert, ISWA, University of Stuttgart
Prof. Dr. Ligy Philip, IIT Madras
Prof. Dr. B.S. Murty, IIT Madras

IGCS Staff

Dr. Sasidhar Palagummi, IGCS Senior Scientist, IIT Madras

Ms. Eva Portius, IGCS Project Manager,
RWTH Aachen University
